

Brand and project

Q01 What is MALAI?

Some admire legends; others make them part of their collection. Inspired by legendary Chinese horses, MALAI brings together nine NFT collectibles, reservations, limited-time purchases, fixed-period collecting, transfers at maturity and community participation.

Q02 What is the complete participation process?

Follow six steps: register and activate your account → reserve a session → join the purchase session on time → pay in USDT within 30 minutes → hold for the collection period → transfer and settle at maturity under the platform rules.

Q03 What are MALAI and USDT used for?

MALAI is used for reservations, regular referral rewards, task rewards and account reinstatement. USDT pays for account activation and collectible orders. There is no fixed exchange ratio between the two. The activation fee is separate from the order amount.

Q04 What are the nine horses called?

Hu Lei Bo, Zi Xing, Jing Fan, Shi Zi Cong, Zhao Ye Bai, Wu Zhui, Di Lu, Jue Ying and Chi Tu. Each has its own character, purchase session, order-value range and collection period.

The actual platform pages and agreement govern.

Accounts and qualifying users

Q05 How much does account activation cost?

Account activation costs 10 USDT once. After activation, you receive 28 MALAI. Explore the nine horses and their sessions, then choose the first horse for your collection.

Q06 Does activation include the collectible order amount?

No. Account activation and collectible orders are charged separately. After securing an order, you must still pay its USDT amount. Prepare the required funds before making a reservation.

Q07 What is a qualifying user?

A qualifying user holds at least one product whose collection period has not yet expired. Registration or account activation alone is insufficient. This definition applies to both individual eligibility and team-member counts.

Q08 Who can receive regular referral rewards?

You must hold an active collectible and satisfy the conditions for the relevant reward. Direct referral, generation and rank differential rewards use the relevant downstream users' actual MALAI consumption as their calculation base. Same-rank rewards use the sum of three specified reward categories earned by a directly referred user of the same rank. All regular referral rewards are paid in MALAI.

Reservations and purchase sessions

Q09 How do I make a reservation?

Choose a horse and reserve before its purchase session starts. The required MALAI is deducted at reservation. You must then click to participate during that horse's purchase session. Reservation and purchase participation are separate actions; both are required.

Q10 When is MALAI refunded?

If you reserve, participate within the specified session and fail to secure an order, the reserved MALAI is returned automatically. Join on time and complete the required participation steps.

Q11 When is MALAI consumed?

MALAI is consumed if you secure an order or fail to click to participate within the specified session after reserving. A missed payment deadline does not refund MALAI already consumed. Remember to join your selected session on time.

Q12 When do the daily purchase sessions start?

There are nine sessions daily, starting on the hour from 13:00 to 21:00. Each lasts 10 minutes; the final session ends at 21:10. All times in these materials use UTC+8. The actual platform schedule governs.

The actual platform pages and agreement govern.

The nine horses and their parameters

Q13 What order values and collection periods are available?

Across the nine horses, order values range from 50 to 2,000 USDT and collection periods from 1 to 15 days. Each horse has its own specific range. The overall range does not apply to every horse.

Q14 What are the periods and rates for each horse?

Shi Zi Cong: 1 day / 4%; Zhao Ye Bai: 2 days / 5%; Jing Fan: 3 days / 8%; Wu Zhui: 4 days / 9%; Zi Xing: 5 days / 14%; Di Lu: 6 days / 12%; Hu Lei Bo: 7 days / 18%; Jue Ying: 8 days / 15%; Chi Tu: 15 days / 25%.

Q15 Are these daily return rates?

No. Each displayed rate applies to the entire collection period. Do not multiply it by the number of days. These are parameters specified by the project rules, not a guarantee of principal protection or returns.

Q16 What should I check before choosing a horse?

Alongside its appearance and your preferences, check the horse’s name, session, required MALAI, USDT order range, collection period and full-period rate. The project introduction and infographic contain all nine sets of parameters.

Payment and settlement calculations

Q17 How soon must I pay after securing an order?

Pay the order in USDT within 30 minutes of securing it. The collection period begins after payment. Check the order countdown and complete payment on time.

Q18 Is payment to my wallet guaranteed at maturity?

The system arranges transfer and settlement to your wallet according to the rules. Actual receipt depends on the transaction, available funds and system execution. Automatic processing describes the workflow; it does not guarantee payment under every circumstance.

Q19 How do I calculate nominal returns for one period?

For Chi Tu, assume an order of 1,000 USDT, a 15-day period and a 25% full-period rate. Under a full-settlement scenario, nominal returns are 250 USDT and principal plus returns total 1,250 USDT. The 25% applies to the whole period; do not multiply it by 15 days.

Q20 Are nominal returns the same as net returns?

No. Deduct the actual cost of acquiring the MALAI used for this order, any first-time activation fee and other actual costs. MALAI rewards that have not been sold cannot be counted directly as USDT income.

MALAI distribution and trading

Q21 How can I obtain MALAI?

MALAI is distributed through referral rewards and can also be obtained through activation grants, task rewards or market trades. Regular referral rewards are paid in MALAI. Buyers and sellers set their market listing prices freely.

Q22 Does MALAI have a fixed USDT price?

No. There is no fixed exchange price. Users set prices freely and place orders in the market. A listing price is not an executed price, and execution is not guaranteed. Use your actual acquisition cost in calculations.

Q23 What fee applies when selling MALAI?

After a trade is completed, the platform charges the seller a 5% transaction fee. Net sale proceeds = executed quantity × execution price × 95%. Use completed-trade data, not an unfilled listing price.

Q24 Is the 5% referral reward the same as the 5% trading fee?

No. The 5% direct referral reward is based on the directly referred user's actual MALAI consumption. The 5% seller fee applies when a market trade is completed. One is a reward; the other is a transaction cost. Calculate them separately.

The actual platform pages and agreement govern.

V6.0 / 2026.09.24

Referral reward calculations

Q25 How is the direct referral reward calculated?

The direct referral reward is an added reward category with a rate of 5%. Once you meet referral eligibility requirements, it is calculated on your directly referred user's actual MALAI consumption and paid in MALAI. Explain the participation rules clearly when sharing the project.

Q26 How are generation rewards unlocked?

Each additional qualifying direct referral unlocks one generation at 1%, up to 20 generations. Rewards are calculated on the relevant downstream users' actual MALAI consumption and paid in MALAI. Qualifying participation is required to unlock each generation.

Q27 How is the rank differential reward calculated?

V1–V9 have reward rates of 5%–70%. You must meet the rank requirements. To calculate the reward, multiply the relevant downstream users' actual MALAI consumption by the applicable difference between rank rates. Rewards are paid in MALAI. These percentages allocate referral rewards; they are not investment return rates.

Q28 Which rewards count toward the same-rank reward?

When you and a directly referred user hold the same rank, you can receive 10% of that user's generation, direct referral and rank differential rewards combined, paid in MALAI. Collection-period returns, task rewards and same-rank rewards are excluded. If the three eligible categories total 100 MALAI, the same-rank reward is 10 MALAI.

Rank requirements: V1–V9

Q29 What personal MALAI consumption is required for each rank?

V1–V7 require personal MALAI consumption of 50, 100, 200, 400, 600, 1,000 and 1,500 respectively, alongside the corresponding qualifying team-member counts. Advancement is based on personal MALAI consumption, not personal collection-period returns.

Q30 What are the V1–V7 team requirements and rates?

Qualifying members in your network / rank rate: V1: 5 / 5%; V2: 15 / 10%; V3: 50 / 15%; V4: 150 / 20%; V5: 300 / 30%; V6: 600 / 40%; V7: 1,000 / 50%. Both the member count and corresponding personal MALAI consumption threshold must be met.

Q31 What is required for V8?

Two V7 members across two separate branches qualify for V8, which has a 60% rank differential rate. Check the rank reached in each branch; the total number of members alone is insufficient.

Q32 What is required for V9?

Three V8 members across three separate branches qualify for V9, which has a 70% rank differential rate. This is a branch-specific rank requirement. Check each branch’s progress against the V9 conditions.

Tasks and rewards

Q33 How do the daily reservation task tiers work?

Reserve and participate in the corresponding purchase sessions. Complete 3 sessions in one day to earn 3 MALAI. At 6 sessions, earn another 5, bringing the total to 8. At 9 sessions, earn another 12, bringing the total to 20. The increments are 3, 5 and 12; do not add 3, 8 and 20. Referring one qualifying user that day earns a separate 6 MALAI.

Q34 What is the first market-trade task reward?

Completing your first successful trade in the exchange market fulfils a one-time task and earns 6 MALAI. An unfilled listing does not count. The reward depends on a completed trade.

Q35 What does linking an email address do?

The one-time email-linking task rewards 5 MALAI. For a session you have reserved, you can receive an email reminder 10 minutes before it starts. This reminder time is not a universal reservation window.

Q36 What is the reward for collecting all nine horses?

Each time you complete the recurring task of collecting all nine horse types, you receive 288 MALAI. This helps prepare for future reservations; it is not a fixed USDT reward.

The actual platform pages and agreement govern.

V6.0 / 2026.09.24

Payment defaults and reinstatement

Q37 What happens if I miss the 30-minute payment deadline?

The account is blocked automatically. Referral rewards stop, and automatic payouts for orders whose proceeds have not yet been received are suspended. MALAI consumed when securing the order is not refunded because of late payment. Prepare funds before reserving and pay promptly.

Q38 How much MALAI does the first reinstatement cost?

The first reinstatement costs 50 MALAI. After paying that amount, you must also pay the original purchase order within 30 minutes to complete reinstatement. These are two consecutive required steps.

Q39 What happens after the second and third defaults?

Each account has only two reinstatement opportunities. The second costs 200 MALAI; a third default results in permanent account blocking. Plan each reservation and payment carefully.

Q40 Does paying the reinstatement MALAI restore my account immediately?

No. You must pay the original order within 30 minutes after paying the reinstatement MALAI. Collection-period returns and referral rewards resume only after reinstatement is complete. Check the payment and account status. The actual platform pages and agreement govern.

The actual platform pages and agreement govern.

Collection goals and community

Q41 How can I set a collection goal?

Start with a horse that appeals to you, or aim to complete the nine-horse collection. Consider each horse's appearance, order amount and collection period, so every addition reflects your own choice.

Q42 How can I participate in the community?

Connect with people who share your interest. Discuss horse choices, share collection progress, learn the participation rules and complete community tasks. Explain your experience clearly to help new members understand where to begin.

Q43 Which materials should I read first?

Start with the infographic for an overview, then read the project introduction to understand the nine-horse collection and participation mechanism. Consult this market FAQ for specific questions. Use the three together to make an informed choice.

Q44 How do I begin collecting?

Choose your first horse, check its session and order amount, then register, activate and reserve. There are nine daily sessions, each lasting 10 minutes. Plan ahead, collect a legend and begin your own digital collection story.
