Collect the legendary nine. Build shared conviction.

Six steps to participate

Follow six steps: register and activate your account → reserve a session → join the purchase session on time → pay in USDT within 30 minutes → hold for the collection period → transfer and settle at maturity under the platform rules.

Account activation costs 10 USDT once. After activation, you receive 28 MALAI. Explore the nine horses and their sessions, then choose the first horse for your collection.

Choose a horse and reserve before its purchase session starts. The required MALAI is deducted at reservation. You must then click to participate during that horse's purchase session. Reservation and purchase participation are separate actions; both are required.

If you reserve, participate within the specified session and fail to secure an order, the reserved MALAI is returned automatically. Join on time and complete the required participation steps.

MALAI is consumed if you secure an order or fail to click to participate within the specified session after reserving. A missed payment deadline does not refund MALAI already consumed. Remember to join your selected session on time.

The nine legendary horses

Collectible	Session (UTC+8)	MALAI required	Order amount (USDT)	Days	Full-period rate
Hu Lei Bo	13:00–13:10	8	50–200	7	18%
Zi Xing	14:00–14:10	7	100–300	5	14%
Jing Fan	15:00–15:10	16	200–500	3	8%
Shi Zi Cong	16:00–16:10	12	300–600	1	4%
Zhao Ye Bai	17:00–17:10	20	400–800	2	5%
Wu Zhui	18:00–18:10	45	500–1000	4	9%
Di Lu	19:00–19:10	72	600–1200	6	12%
Jue Ying	20:00–20:10	105	700–1500	8	15%
Chi Tu	21:00–21:10	200	800–2000	15	25%

There are nine sessions daily, starting on the hour from 13:00 to 21:00. Each lasts 10 minutes; the final session ends at 21:10. All times in these materials use UTC+8. The actual platform schedule governs.

No. Each displayed rate applies to the entire collection period. Do not multiply it by the number of days. These are parameters specified by the project rules, not a guarantee of principal protection or returns.

Referral rewards and eligibility

A qualifying user holds at least one product whose collection period has not yet expired. Registration or account activation alone is insufficient. This definition applies to both individual eligibility and team-member counts.

You must hold an active collectible and satisfy the conditions for the relevant reward. Direct referral, generation and rank differential rewards use the relevant downstream users' actual MALAI consumption as their calculation base. Same-rank rewards use the sum of three specified reward categories earned by a directly referred user of the same rank. All regular referral rewards are paid in MALAI.

The direct referral reward is an added reward category with a rate of 5%. Once you meet referral eligibility requirements, it is calculated on your directly referred user's actual MALAI consumption and paid in MALAI. Explain the participation rules clearly when sharing the project.

Each additional qualifying direct referral unlocks one generation at 1%, up to 20 generations. Rewards are calculated on the relevant downstream users' actual MALAI consumption and paid in MALAI. Qualifying participation is required to unlock each generation.

V1–V9 have reward rates of 5%–70%. You must meet the rank requirements. To calculate the reward, multiply the relevant downstream users' actual MALAI consumption by the applicable difference between rank rates. Rewards are paid in MALAI. These percentages allocate referral rewards; they are not investment return rates.

When you and a directly referred user hold the same rank, you can receive 10% of that user's generation, direct referral and rank differential rewards combined, paid in MALAI. Collection-period returns, task rewards and same-rank rewards are excluded. If the three eligible categories total 100 MALAI, the same-rank reward is 10 MALAI.

Rank	Qualifying network members	Personal MALAI consumption required	Differential rate
V1	5	50	5%
V2	15	100	10%
V3	50	200	15%
V4	150	400	20%
V5	300	600	30%
V6	600	1000	40%
V7	1000	1500	50%

V1–V7 require personal MALAI consumption of 50, 100, 200, 400, 600, 1,000 and 1,500 respectively, alongside the corresponding qualifying team-member counts. Advancement is based on personal MALAI consumption, not personal collection-period returns.

Two V7 members across two separate branches qualify for V8, which has a 60% rank differential rate. Check the rank reached in each branch; the total number of members alone is insufficient.

Three V8 members across three separate branches qualify for V9, which has a 70% rank differential rate. This is a branch-specific rank requirement. Check each branch's progress against the V9 conditions.

MALAI market

MALAI is distributed through referral rewards and can also be obtained through activation grants, task rewards or market trades. Regular referral rewards are paid in MALAI. Buyers and sellers set their market listing prices freely.

No. There is no fixed exchange price. Users set prices freely and place orders in the market. A listing price is not an executed price, and execution is not guaranteed. Use your actual acquisition cost in calculations.

After a trade is completed, the platform charges the seller a 5% transaction fee. Net sale proceeds = executed quantity × execution price × 95%. Use completed-trade data, not an unfilled listing price.

Tasks and incremental rewards

Reserve and participate in the corresponding purchase sessions. Complete 3 sessions in one day to earn 3 MALAI. At 6 sessions, earn another 5, bringing the total to 8. At 9 sessions, earn another 12, bringing the total to 20. The increments are 3, 5 and 12; do not add 3, 8 and 20. Referring one qualifying user that day earns a separate 6 MALAI.

Completing your first successful trade in the exchange market fulfils a one-time task and earns 6 MALAI. An unfilled listing does not count. The reward depends on a completed trade.

The one-time email-linking task rewards 5 MALAI. For a session you have reserved, you can receive an email reminder 10 minutes before it starts. This reminder time is not a universal reservation window.

Each time you complete the recurring task of collecting all nine horse types, you receive 288 MALAI. This helps prepare for future reservations; it is not a fixed USDT reward.

Payment and reinstatement

Pay the order in USDT within 30 minutes of securing it. The collection period begins after payment. Check the order countdown and complete payment on time.

The system arranges transfer and settlement to your wallet according to the rules. Actual receipt depends on the transaction, available funds and system execution. Automatic processing describes the workflow; it does not guarantee payment under every circumstance.

The account is blocked automatically. Referral rewards stop, and automatic payouts for orders whose proceeds have not yet been received are suspended. MALAI consumed when securing the order is not refunded because of late payment. Prepare funds before reserving and pay promptly.

The first reinstatement costs 50 MALAI. After paying that amount, you must also pay the original purchase order within 30 minutes to complete reinstatement. These are two consecutive required steps.

Each account has only two reinstatement opportunities. The second costs 200 MALAI; a third default results in permanent account blocking. Plan each reservation and payment carefully.

No. You must pay the original order within 30 minutes after paying the reinstatement MALAI. Collection-period returns and referral rewards resume only after reinstatement is complete. Check the payment and account status. The actual platform pages and agreement govern.
